

The Engineered Process Solutions (EPS) division of Cummins-Wagner is proud to introduce the SPG-1.5-10 and SPG-10-3 **Glycol Make-Up Unit**. Designed, fabricated, and assembled at our facility, the Glycol Make-Up Unit automatically supplies make-up glycol to your closed loop heating or cooling system.

The SPG-1.5-10 Glycol Make-Up Unit is capable of delivering up to 1.5GPM of glycol at 100psi. The SPG-10-3 Glycol Make-Up Unit is capable of delivering up to 10GPM of glycol at 30psi. Each package is completely pre-piped and pre-wired. This system operates on a standard 115/1/60 power connection and supplies make-up glycol through a single system connection.

### Glycol Holding Tank

- 55 gallon polyethylene tank with graduated level markings for easy level gauging
- Tank lid includes vent, fill, and return connections

### Low Level Shut-Off

- Automatic pump shut off at low liquid level provides added level of protection

### Pump and Motor

#### SPG-1.5-10

- Rotary gear pump
- 1.5GMP @ 100 psi pump capacity
- 1/3 hp motor

#### SPG-10-3

- Goulds NPE Series pump
- 10GMP @ 30 psi pump capacity
- 1/2 hp motor

### Panel

- Includes operational indicator lights and contact for low liquid level alarm

### Pressure Control

- Pressure switch maintains minimum system pressure levels automatically

### System Connection

- 1/2" or 3/4" NPT system connection for easy installation

### Frame

- Painted carbon steel base and supports, complete with holes for anchoring
