A PROUD PAST *A Promising Future*

Since 1949, Siewert Equipment has serviced the industrial and municipal (water/wastewater) markets in Upstate New York. Over the years, we've built our reputation on providing high-quality products, engineering expertise, and impeccable customer service. We are a distributor for more than 80 premier manufacturers of pumps, mixers, and process equipment. Now a division of Cummins-Wagner, Co. Inc., we are a part of one of the Mid-Atlantic's fastest-growing mechanical equipment distributors and a stronger-than-ever, employee-owned company.

PROFESSIONAL SERVICE, PROVEN EXPERTISE *Personalized Solutions*

With offices in Rochester, Albany, and Buffalo, Siewert Equipment offers concept-to-completion engineering expertise, plus two authorized service centers (Rochester and Albany). We can provide everything from off-the-shelf units to custom-engineered skids that are built to spec in our own facilities. We'll help you identify the right equipment solutions for your application, and then we stand by our products, providing all of the aftermarket support that you need to succeed. We are your one-stop shop for all of your fluid-handling needs, and we look forward to serving you.

The Leader in Low Pressure Sewer Technology.

THE BEST PEOPLE IN THE BUSINESS

The Best Service

Comprehensive Customer Service:

- Order Entry/Expediting Team
- Dedicated Parts Specialists

UNPARALLELED AFTERMARKET SERVICE

THE RIGHT PEOPLE

- Factory-Authorized Service Technicians
- Specialized Service Coordinators

THE RIGHT RESOURCES

- Service Centers (Rochester & Albany)
- Fully-Equipped Service Trucks
- Flatbed Truck with Crane
- Five-Ton Fork Trucks
- Ten-Ton Overhead Crane
- Three-Ton Jib Cranes
- VibrAlign XA-Pro Laser Alignment Systems
- 14,000 Square Feet of Combined Service & Shop Space

THE RIGHT SERVICES

- 24/7 Emergency Services
- Installation, Start-Up & Commissioning
- Complete Teardown, Repair & Assembly
- Laser Alignment & Vibration Analysis
- Machine Repair & Fabrication
- Pump Improvement Services
- Preventive Maintenance Services

Superior Solids-Handling WASTEWATER & INDUSTRIAL EQUIPMENT.

Choosing a pump is not an easy task. There are hundreds of possible configurations depending on your individual needs. This is where a Gorman-Rupp distributor can be a big help. They are qualified and trained to assist you, providing expert advice on pump selection and application.

Siewert Equipment can show you all your pumping options, and have trained service personnel on hand in case you ever have a service request. And, because they are backed by Gorman-Rupp, they have one of the fastest replacement parts delivery services in the industry. Because we apply the same high standards to our distributors that we do to our pumps, you can trust that you are going to get the best pump and the best service possible from Siewert Equipment.

Gorman-Rupp and Siewert Equipment...
Working together to solve all of your pumping needs.

WEIR WEMCO® Pumps & Systems

WEMCO® Model C Torque-Flow®

WEMCO® engineers designed the Model C Torque-Flow® pump with two unique features: (1) A cup-type impeller to totally eliminate clogging which efficiently handles pipe-sized solids. (2) Extra thick impeller for durability and economy. The case is made in two pieces with a sacrificial suction piece which can be replaced quickly, easily, and economically.

For endurance, all wet-end parts are constructed of Hi-Chrome, an alloy of greater hardness than destructive silica sand and other materials.

The Model C Torque-Flow® pump quickly proves its superior toughness, durability, and clog-resistant performance.

Model CF™ Chop-Flow Pump

Created by the same engineers and manufactured side-by-side with the dependable WEMCO® and WEMCO®-Hidrostal Pumps you already have in service, the WEMCO® Model CF™ chopper pump is just as rugged and dependable. It is a cost-effective addition to the problem-solving, trouble-free WEMCO® pumps you installed years ago.

The WEMCO® Model CF™ chopper pump chops as it pumps, keeping oversized solids and stringy material from clogging your downstream process.

WEMCO®-Hidrostal

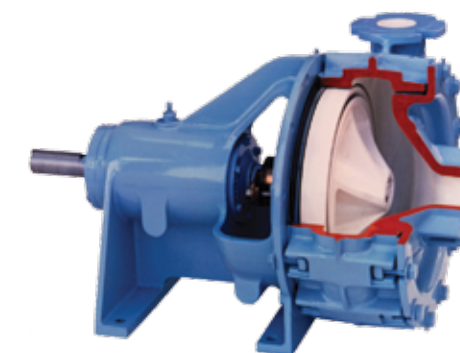

The screw/centrifugal impeller with open channel design combines the clog-resistant features of a vortex pump and the high efficiency of a centrifugal pump.

The screw section of the WEMCO®-Hidrostal pump performs like an Archimedes spiral. In thick sludges, slurries, and suspended solids, it burrows like a corkscrew to start the material pumping and keep it pumping. The centrifugal section produces steep head-capacity curve for non-overlapping performance.

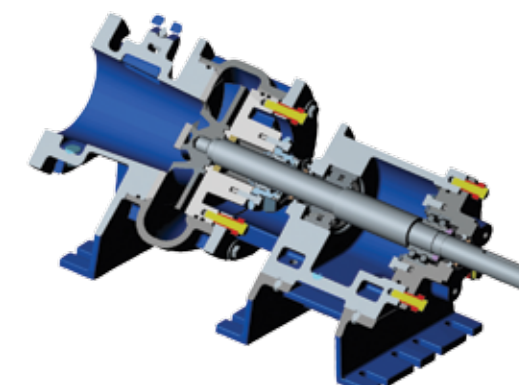

Combined, the screw/centrifugal action provides high, hydraulic efficiencies and clog-resistant pumping. The pump is able to handle large soft solids with efficiencies of more than 80 percent.

WEMCO® Hydrogritter®

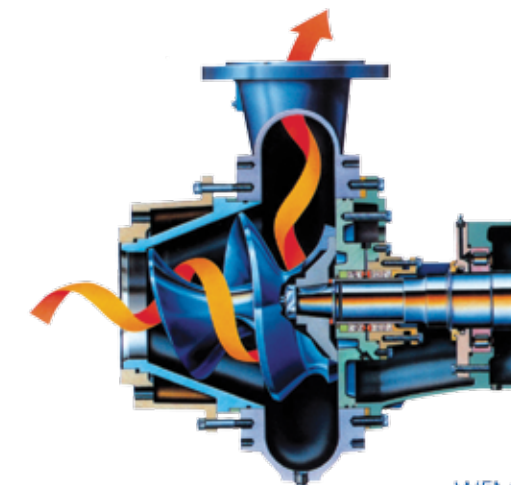

WEMCO® Hydrogritter® components are designed as a system to optimize each piece of equipment - both mechanically and hydraulically - to consistently produce long-term, high performance grit removal automatically with unmatched reliability and low operating and maintenance costs.

CONTINUING EDUCATION PROVIDER

Drawing on a wealth of engineering and service expertise, Siewert Equipment offers accredited seminars and training for engineers and operators. With professional licensing credits provided by organizations such as the Practicing Institute of Engineers (PIE), the NYS Dept. of Environmental Control (DEC), and the NY Department of Health (DOH), Siewert Equipment can help you stay on the cutting edge of the industry. Many of our seminars include in-shop demonstrations with glass-faced pumps, hands-on training, and introductions to the latest developments in fluid-handling technology. Call us or visit our website for more information.
