EPS

Cummins - Wagner

Heat Transfer Packages

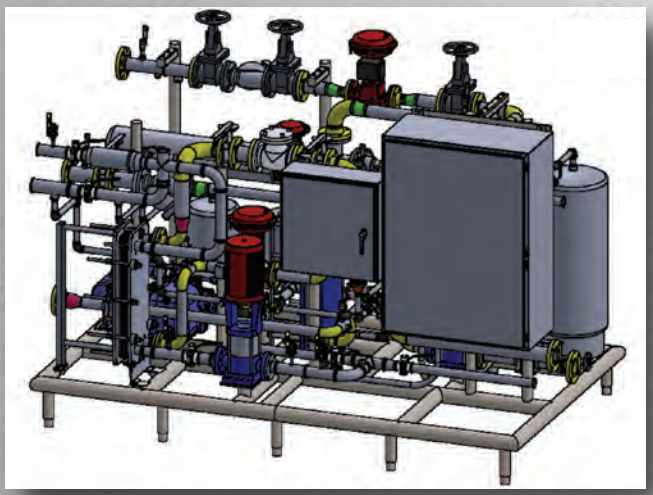
Cummins-Wagner offers turn-key heat transfer packages for commercial and industrial customers. Each heat transfer package is designed and fabricated to meet your specific process conditions and requirements.

Standard Heat Transfer Equipment & Components

- Pumps
- Heat Exchangers
  - Shell and Tube
  - Plate and Frame
- Expansion Tanks
- Chemical Feed Tanks
- Control Panels
- Instruments and Transmitters
- Steam Control Assemblies
- Condensate Trap Assemblies

Cummins-Wagner and EPS engineers handle system sizing calculations of heat exchangers, pumps, steam control valves, piping, and other critical system components to ensure that required hear transfer rates are achieved.

Wall-mounted steam/hot water package



Sanitary triplex heat transfer system

We Are Able to Accomodate:

- Small footprints & Wall mounted systems
- Multiple transfer loops on single skid
- Specific manufacturers
- Short lead times
- Site specific controls & communication requirements
- Sanitary piping and skid design

EPS provides a full engineering submittal, including mechanical and electrical drawings, for every packaged system.

Heat Transfer Controls and Monitoring

EPS will specify and select the proper instrumentation to monitor and control your heat transfer process, including:

- Pressure and Temperature Transmitters
- Steam or Hot Water Control Valves
- Process Gauges
- Flow Meters
- VFD Flow Control
- Remote Enable and Control
- Monitoring Status and Alarm
- Customer Specified Brands or Manufacturers

EPS also offers a full line of process chillers and chilled fluid recirculation packages. Please visit our website for more information.

Let us build your Solution.
