

PRE-STORM PREP • POST-STORM REPAIR • 24/7 SERVICE

Steps to minimize damage to your cooling tower in the event of a hurricane

- Shut off electrical supply to the mechanical equipment
- Tie fans down to prevent wind milling
- Make sure basin covers are fastened, remove or tie down or remove any loose items on the fan deck
- Secure any loose casing or louvers

SPX Cooling Technologies is prepared to help after the storm

Our crews can assist with pre-storm preparations as well as post-storm repairs

- SPX maintains an inventory of critical cooling tower components including all mechanicals and fill material for your Marley, BAC and Evapco brand cooling towers
- Our manufacturing facilities are prepared for emergency service
- After the storm SPX Reps are ready to assist with cooling towers inspections to ensure your tower is safe to start-up
