

INCREASE YOUR PROFITS BY AS MUCH AS 30%

Siewert Equipment will show you how with E/One sewer systems.

PRESERVING NATURAL BEAUTY

Home builders can uphold the aesthetic appeal of the landscape:

- Directional drill around trees or yard features, easier to install and quicker site restoration
- Ideally suited for lake front properties and environmentally sensitive areas

MITIGATE RISK OF SUBSURFACE CONDITIONS

Our approach are small diameter force mains just below the frost line.

- Minimizes the need for construction dewatering
- Eliminates the need for deep excavations, rock excavation

REDUCING INFRASTRUCTURE COSTS

Reduce or defer infrastructure costs.

- Utilize the time value of money, purchase the residential grinder pump when you build the home
- Low initial costs make centralized sewers more economically feasible

INCREASE LOT DENSITY

Home builders can increase lot density by adopting innovative solutions:

- Eliminates need for onsite-septic systems
- Eliminates need for large, centralized sewage lift stations

MOST AFFORDABLE WAY TO SEWER A HOME

Maximize the time value of money.

- Saves up front capital costs during subdivision development
- No preventative or routine maintenance required

SEWER THE MOST CHALLENGING APPLICATION

Utilize directional drilling or shallow open trenching.

- Ideal for flat, wet, rocky, or hilly
- Follow the natural contour of the land

RELIABLE AND SUSTAINABLE

The most rugged, long-lasting pump in the industry.

- 25-year life expectancy, 13 years mean time between service calls
- Developed in 1969, with over 875,000 installations

YOUR TRUSTED PARTNER IN PRESSURE SEWER SYSTEMS

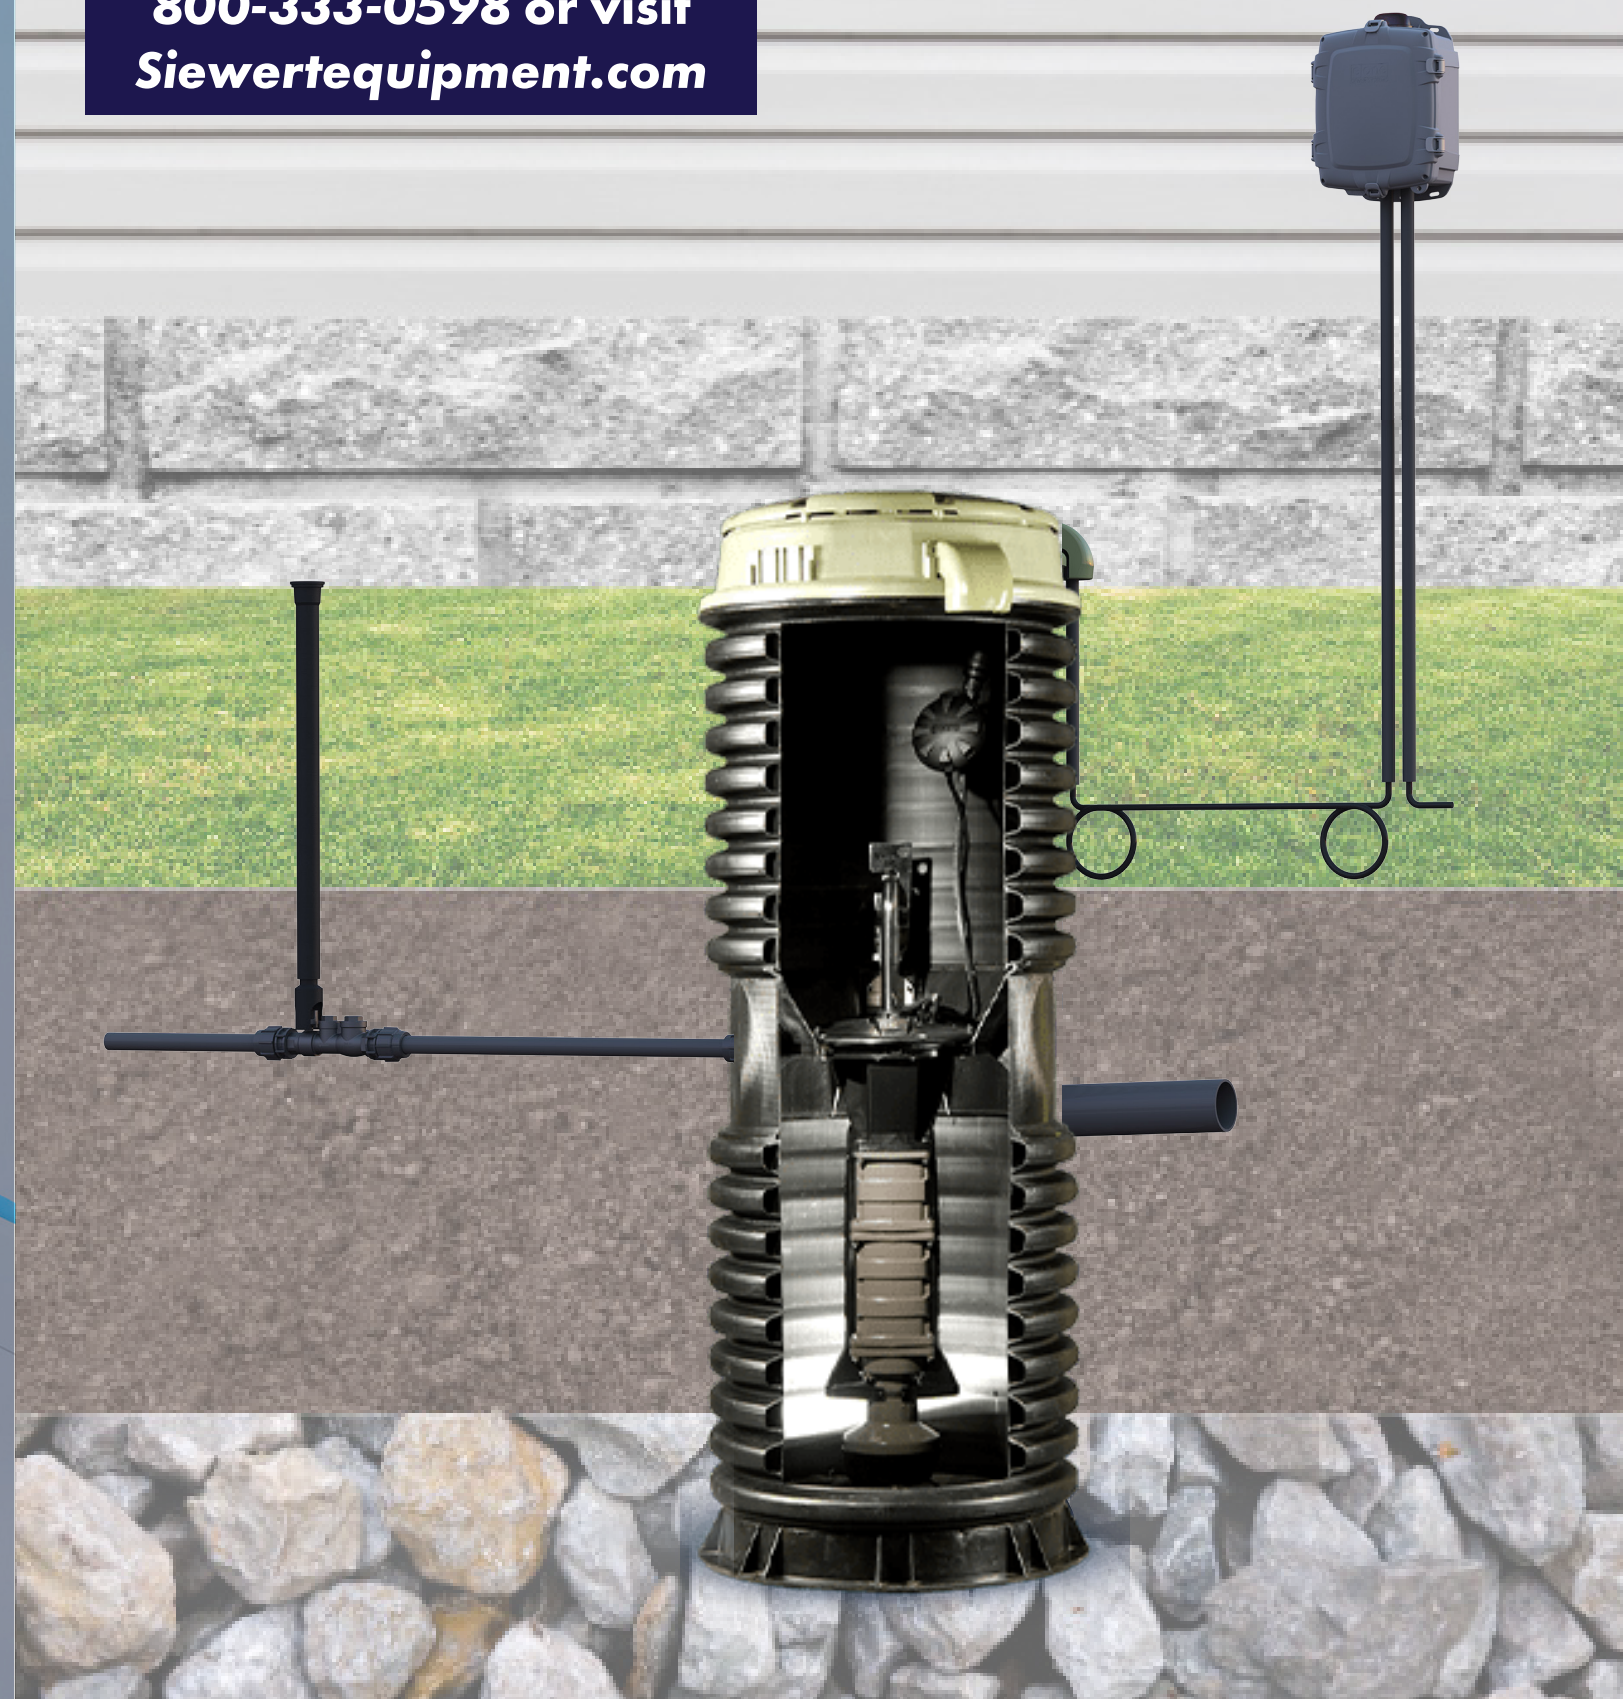

E/One sewer systems is the world leader in this technology.

- Every day 180 homes connect to pressure sewer worldwide
- Siewert Equipment is the sole distributor for sales, service, warranty and aftermarket parts
