

Air Audits

We offer Compressed Air Audits to increase your bottom line and find energy-saving solutions to your systems. During an audit, we measure the system's demand, kW, amps, flow (cfm), & pressure (psi) using ACR data loggers.

- Helps save you energy, time, and money with your equipment
- Potential energy rebates with our equipment

"Air audits are a way for us to provide logical solutions to our customers. We want to provide them with the best information so that together we can install an appropriately sized, energy-efficient system."

- Justin Radebaugh, Compressed Air & Vacuum Specialist

Packaged Systems

The Engineered Process Solutions division of Cummins-Wagner offers turn-key compressed air packaged systems to meet your specific plant air needs.

Package Features:

- Standard capacities from 25hp-300hp or greater
- Oil Flooded, Oil Free, Oil-less options available
- Equipment sizing, line sizing, and package layout design completed in-house by engineering team.
- Packages include all piping, electrical, and accessory equipment for a complete working system.
