

Does Cold Weather Freeze the Productivity of Your Plant?

Are you tired of nuisance alarms and alerts from your control lines freezing up and shutting down your plant?

Does your compressed air building allow outside cold air inside all the time?

Does your compressor building have access points for snow and rain to enter, damaging your precious equipment?

Let us help with our Compressed Air Buildings!

EPS Compressed Air Buildings - Keep the Cold Weather Out!

- We provide electrically operated louvers to keep the cold weather out when compressors are not in operation.
- We standardize on diamond plated flooring for a professional finish!

- EPS' insulated walls and heater, along with a heat recovery louver system, are all designed to keep the Ambient Air Temperatures warmer in cold winter months.
- Keep your plant running even through the winter!

Let us build your Solution.
