

## **SEEPEx Testimonial – Livingston County Water & Sewer Authority**

### **Before...**

It took just a few weeks for the new Chief Operator at Livingston County Water & Sewer Authority (LCWSA) Lakeville, NY plant to realize the old plunger-style pumps couldn't keep up with the flow, pressure, or even basic housekeeping standards required for sludge handling. Constant leaks and heavy maintenance made them inefficient and messy to operate.

### **After.**

Partnering with engineering firm CPL, the LCWSA team sought a more efficient, cleaner pump. They chose the SEEPEx SCT (Smart Conveying Technology) Pump for its flow, pressure capacity, and low maintenance. SEEPEx and Siewert Equipment teamed up to size and startup the pump. Two years later, the pump runs smoothly and efficiently.
